Phone: +44 01270 258200  
Fax: +44 01270 258444  
E-mail: cba@chemical.org.uk

### Why attend?

HAZID and HAZOP are two widely utilised techniques for the identification of hazards in the process industries. Identification of hazards is the important first step in carrying out a risk assessment – something that all health and safety legislation requires.

This one day course will enable you to:

- Understand the principles that underline all types of risk assessment
- Ensure your risk assessments are proportionate and appropriate
- Manage the risk assessment process within your organisation or department

The course uses practical workshops in the HAZID and HAZOP technique tailored to typical warehousing and storage operations, and provides you with tips and techniques for use.

### Who should attend?

You should attend if you undertake, participate in or manage risk assessments in the process industries.

This will include:

Managers; Supervisors, Engineers, Operators, Technicians; health and safety professionals

Note: This course is for Storage, Distribution and Manufacturing Companies only.

*The workshop provides a basic insight into aspects of the identification of hazards using the HAZID and HAZOP techniques including:*

- ◆ *Understanding when and why HAZID & HAZOP should be used*
- ◆ *Practical workshops on how to use HAZID and HAZOP tools*

*Throughout the day you will be able to put your questions to an expert in these techniques, and engage with the other learners to share good practice*

**HAZID / HAZOP WORKSHOP****PROPOSED OUTLINE AGENDA AND BOOKING DETAILS****CONFIRMATION**

Confirmation of booking will be issued by email, when the booking is processed. **DO NOT make any travel arrangements without confirmation.**
