Why attend?

All round the world, it is accepted that the chemicals we use in the workplace can pose a hazard to the health of those at work and those affected by that work, as well as a danger to the environment.

The CLP system in the EU and GHS across the world is used to determine the hazards and communicate them to users.

This 2 day 'competence level' workshop will show how the CLP Regulation ((EC) No 1272/2008) is used to classify hazardous substances and mixtures, and produce labels. It will provide training to allow accurate classification from first principles, the communication of that classification - labels, SDS and allow candidates to be able to answer in-depth legislative questions to ensure compliance.

The course is designed to meet the training and competence requirements of Annex II of REACH

Who should attend?

The workshop is designed to provide personnel requiring a basic knowledge of chemical handling Safety data sheet (SDS) authors, staff responsible for approving SDS and staff responsible for chemical safety management / regulatory affairs

The workshop provides a detailed and comprehensive training into CLP classification including:

- *The Regulatory Framework*
 - *GHS*
 - *CLP*
 - *REACH*
 - *Responsibilities*
 - *Compliance deadlines*
- *The Classification System*
 - *Hazard Classes*
 - *Hazard Pictograms*
 - *Signal Words*
 - *Hazard, Precautionary and EUH Statements*
 - *Principles of precedence*
 - *Classification of substances - including use of the Inventory*
 - *Classification of mixtures - including cut off values, bridging principles, formulae, additivity and summation*
- *Label format, content and application*
- *Packaging*
- *Format and content of SDS*
- *Rules for the provision of SDS*
