

CLP Regulation Post-Brexit Divergence

Online Clinic

22nd June 2023

10:00am – 11:00am

Free of Charge - Member Only

The CLP (Classification, Labelling and Packaging) regulation is based on the United Nations Globally Harmonised System (GHS) and is the system for determining hazards and communicating them down the supply chain. When the UK left the European Union the existing EU CLP regulation was copied across into UK legislation. At this point the GB and EU CLP regulations were exactly the same. Since this time the regulations have been diverging.

Louise Witter from Chemical Legislation Professionals will present an update on the post Brexit divergence of the EU and GB CLP regulations. The presentation will cover:

- EU CLP delegated act and GHS
- EU CLP proposal status
- Annex VIII and poison centre notification
- GB mandatory classification list and EU harmonised classification
- EU ATPs

There will also be ample time for a Q&A session after the presentation for delegates to ask their CLP questions.

Louise Witter is the founder and principal consultant of Chemical Legislation Professionals & CLPEU NI. She has degrees in marine and environmental biology from St Andrews University and law from Aberdeen University. She has been a trainer & consultant on classification, labelling and safety data sheets for more than 20 years.

This is the latest in our ongoing series of 'Online Clinics' and 'Best Practice Workshops,' part of our various initiatives to increase the value of membership. Watch out for other such events going forward.

BOOKING FORM

<p>CLP Regulation Post-Brexit Divergence 22nd June 2023 10:00am – 11:00am Free of Charge – Member Only</p>	
Company Name
