

Carbon accounting the basics

Online Clinic

Tuesday 30th January 2024

11:00am – 12:00pm

Free of Charge – Open to all

Businesses face a variety of sustainability challenges, including determining their path to Net Zero. Carbon accounting is one of the tools for businesses, and it is critical to understand what to focus on and how to quantify carbon emissions in a cost-effective manner. This session will cover the fundamentals of carbon accounting, such as the various calculation methods available, the significance of data granularity, how to collect data as a business, and how to quantify and communicate impact.

About xtonnes

xtonnes[™]

"Making decarbonisation accessible", Founded by Bengt, Andy and Vanessa, xtonnes has always been focussed on driving decarbonisation for product led businesses and their supply chains. They aim to simplify the challenge of addressing carbon emissions through actionable data and expert insights. For more info about xtonnes, click [here](#).
