There is increased attention on Natural Hazards Triggering Technological Accidents (NaTech) and Climate Change adaptation – do you know what it means for you? Are you aware of current expectations of the regulating authorities?

This workshop, facilitated by RAS Ltd will give an overview of what is needed to meet the NEW Adapting to climate change guidance from the Chemical and Downstream Oil Industries Forum (CDOIF).

The workshop will give a working insight into undertaking an NaTech and Climate Change risk assessment, showing you both what should be included, but also why.

There will be case studies to work through, giving practical application.

Hints and tips will be provided, including common pitfalls to avoid.

Open to all but particularly useful to Environmental Managers, those responsible for COMAH Safety Reports or Environmental Permits and regulatory compliance specialists or if you have responsibility for environmental risk assessment at any level or would like a general awareness.

The workshop aims to help you become a more intelligent customer. Key topics covered:

- Principles of NaTech and Climate Change
- Relevant Past Incidents
- Identifying relevant Natural Hazards
- Understanding your NaTech hazards
- Risk Reduction Measures & Emergency Response
- Safety Management Systems
- Case-studies
- Practical experience – hints, tips and pitfalls to avoid

Presented in association with
